

Anti-Fatigue Matting

Workers who stand for long periods on hard floors can suffer from physical fatigue and heart related absenteeism. Safety Walk™ Cushion Matting is a straightforward and low cost solution for reducing leg and back fatigue, and its impact on productivity. It is also anti-slip and offers excellent resistance to oil, grease and detergents.

It makes the workplace more comfortable. It absorbs impact & returns energy to foot while striding. It provides increased traction in wet areas, reducing slips & falls.
